

1. Identification Product iden

Product identifier	Copper-Field [™] With Nutrient Shuttle Effect [™]
Other means of identification	Not available.
Recommended use	Liquid blended fertilizer with chelated micronutrients
Recommended restrictions	None known.

Manufacturer / Importer / Supplier / Distributor Information

Company name Address	West Central Distribution LLC. P.O. Box 897 Wilmar, MN 56201 US	
Telephone Website Contact person Emergency phone number	1.800.242.4277 www.wcdst.com EH&S/Regulatory Department CHEMTREC (24 hours): 1-800-424-9300	
2. Hazard(s) identification		
Physical hazards	Not classified.	
Health hazards	Not classified.	
OSHA defined hazards	Not classified.	
Label elements		
Hazard symbol	None.	
Signal word	None.	
Hazard statement	The mixture does not meet the criteria for classification.	
Precautionary statement		
Prevention	Observe good industrial hygiene practices.	
Response	Wash hands after handling.	
Storage	Store away from incompatible material.	
Disposal	Dispose of waste and residues in accordance with local authority requirements.	
Hazard(s) not otherwise classified (HNOC)	Not classified.	

Supplemental information Not applicable.

<u>3. Composition/information on ingredients</u>

Mixtures		
Chemical name	CAS number	%
Water	7732-18-5	35 - 50
Urea	57-13-6	30 - 40
Copper-diammonium EDTA Complex	67989-88-2	1-5
*Proprietary	*Proprietary	1 - 5

*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

Composition comments The Safety Data Sheet is not a guarantee of product specification or NPK value(s). NPK content is on specified sales orders, customer invoices, or product specification sheets obtained from supplier. 4. First-aid measures Eye contact Check for and remove contact lenses. Flush immediately with copious amounts of water or normal saline (minimum of 15 minutes), holding eyelids apart to ensure complete irritation of the eye and eyelid tissue. Take exposed individual to a health care professional, preferably an opthalmologist, for further evaluation. Skin contact Remove contaminated clothing, shoes and equipment. Wash exposed area with plenty of soap and water. Repeat washing. If redness or irritation occurs, seek medical attention. Wash contaminated clothing before reuse. Inhalation No adverse effects anticipated. If necessary, remove victim to fresh air and loosen clothing. Get medical attention. Ingestion Rinse mouth thoroughly. Drink 1 or 2 glasses of water. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Get medical attention. Most important Prolonged or repeated skin contact may cause irritation. symptoms/effects, acute and delayed **Indication of immediate** Treat symptomatically. medical attention and special treatment needed **General information** Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. 5. Fire-fighting measures Suitable extinguishing Water fog. Water spray. Carbon dioxide (CO₂). Foam. media Unsuitable extinguishing Do not use water jet as an extinguisher, as this will spread the fire. media Specific hazards arising The product is not flammable. During fire, gases hazardous to health may be formed. from the chemical Special protective equipment Self-contained breathing apparatus and full protective clothing should be worn when and precautions for fighting chemical fires. Selection of respiratory protection for firefighting follow the firefighters general fire precautions indicated in the workplace. **Fire-fighting** Use standard firefighting procedures and consider the hazards of other involved materials. equipment/instructions Move containers from the fire area if you can do so without risk. In the event of fire, cool tanks with water spray. Specific Methods Use water spray to cool unopened containers. 6. Accidental release measures Personal precautions,

Personal precautions, protective equipment and emergency procedures Avoid inhalation of vapors and spray mist and contact with skin and eyes. Wear suitable protective clothing. For personal protection see Section 8 of the SDS.

Methods and materials for containment and cleaning up	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with vermiculite, dry sand or earth and place into containers. After removal flush contaminated area thoroughly with water.	
	Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.	
	Never return spills to original containers for re-use.	
Environmental precautions	Prevent further leakage or spillage if safe to do so. Do not contaminate water. Do not allow to enter drains, sewers or watercourses.	
7. Handling and storage		
Precautions for safe handling	Avoid inhalation of vapors/spray and contact with skin and eyes. Use only with adequate ventilation. Observe good industrial hygiene practices.	
Conditions for safe storage, including any incompatibilities	Keep container tightly closed. Store in a cool, dry well-ventilated place. Store away from incompatible materials.	

8. Exposure controls/personal protection

Occupational exposure limits	
Biological limit values	No biological exposure limits noted for the ingredient(s).
Exposure guidelines	Follow standard monitoring procedures.
Appropriate engineering controls	Provide adequate general and local exhaust ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation of vapors and mists.
Individual protection measures such	as personal protective equipment
Eye/face protection	Wear approved safety glasses or goggles.
Skin Protection Hand protection	Chemical resistant gloves are recommended. Be aware that the liquid may penetrate the gloves. Frequent change is advisable. Suitable gloves can be recommended by the glove supplier.
Other	Wear appropriate clothing to prevent repeated or prolonged skin contact.
Respiratory protection	If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Wear air supplied respiratory protection if exposure concentrations are unknown. In case of inadequate ventilation or risk of inhalation of vapors, use suitable respiratory equipment. In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA 29 CFR 1910.134 and ANSI Z88.2.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene consideration	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Handle in accordance with good industrial hygiene and safety practice.

9. Physical and chemical properties

Appearance	
Physical State	Liquid.
Form	Liquid.
Color	Dark red.
Odor	Slight odor.
Odor threshold	Not available.
рН	7.0 - 8.0
Melting point/freezing point	$< 18^{\circ}$ F do not store below this temperature.
Initial boiling point and boiling	Not available.
range	
Flash point	Not flammable.
Evaporation Rate	Not available.
Flammability (solid, gas)	Not available.
Vapor pressure	Not available.
Vapor Density (Air=1)	Not available.
Relative density	1.160 g/ml
Solubility	Completely miscible.
Partition coefficient	Not available.
(n-octanol/water)	
Auto-ignition temperature	Not available.
Viscosity	Not available.
Other information	Not available.
10. Stability and reactivity	
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Stable under normal temperature conditions.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Heat. Extreme temperatures. Contact with incompatible materials.
Incompatible materials	Strong acids. Reactive metals.
Hazardous decomposition products	Nitrogen oxides (NO _x). Metal oxide fumes.

<u>11. Toxicological information</u>

Information on likely routes of exposure

Ingestion Inhalation Skin contact Eye contact	May cause discomfort if swallowed. In high concentrations, vapors may be irritating to the respiratory system. Prolonged or repeated skin contact may cause irritation. May cause eye irritation on direct contact.
Symptoms related to the physical, chemical and toxicological characteristics	Direct contact with eyes may cause temporary irritation.
Information on toxicological effects	

Inf ation on toxicological ef tects

May cause discomfort if swallowed.	
Species	Test Results
-	
Rat	14300 mg/kg
	Species

Skin corrosion/irritation	Prolonged exposure may cause skin irritation.	
Serious eye damage/eye irritation	May cause eye irritation on direct contact.	
Respiratory sensitization	Based on available data, the classification criteria are not met.	
Skin sensitization	Not a skin sensitizer.	
Germ cell mutagenicity	Based on available data, the classification criteria are not	t met.
Carcinogenicity	This product is not considered to be a carcinogen by IAR	RC, ACGIH, NTP, or OSHA.
Reproductive toxicity	Based on available data, the classification criteria are not	t met.
Specific target organ toxicity- single exposure	In high concentrations, vapors may be irritating to the re-	spiratory system.
Specific target organ toxicity- repeated exposure	Based on available data, the classification criteria are not	t met.
Aspiration hazard	Based on available data, the classification criteria are not	t met.
Chronic effects	Prolonged exposure may cause chronic effects.	
Further information	No other specific acute or chronic health impact noted.	
<u>12. Ecological information</u>		
Ecotoxicity	The product is not classified as environmentally haza	
	exclude the possibility that large or frequent spills ca effect on the environment.	in have a harmful or damaging
